TOWNSHIP 7

The grape and root based wines that grow here cannot be found anywhere else in the world. They are distinct, and a result of many influences—much like BC itself.

This is a place of deep, & places of new tradition.

Above all, it's a place you should visit.

Find out more at www.t7wa.ca

The Fraser Valley wine region is unique, characterized by soil rich with organic elements, a cooler growing season, and ever-changing weather flowing in from the nearby Pacific coast.

What sets the area apart, however, are the individual stories of the wine-makers themselves. Some influenced by an old world lineage, others by inherent creativity, they are pioneers, like those hundreds of years before them.
